## PROFILE

I recently completed an 8-week Biomanufacturing Certificate Program with BioConnect DE, where I gained the skills necessary for the day to day processes in a biomanufacturing environment. The strong focus on industry standards and global protocols gives me the skills to transition into production roles in Delaware's growing life science industry, including GDP, cGMP, QMS, and ISO protocols. I am seeking positions to apply my detail oriented and leadership focused style, and build a strong career in biomanufacturing.
